

Financial Tear Sheet

Corporate Profile

ConforMIS is a medical technology company that uses its proprietary iFit[®] Image-to-Implant[®] technology platform to develop, manufacture and sell joint replacement implants that are individually sized and shaped, or customized, to fit each patient's unique anatomy. ConforMIS offers a broad line of customized knee implants designed to restore the natural shape of a patient's knee. In recent clinical studies, iTotal[®] CR, ConforMIS' cruciate-retaining total knee replacement implant and best-selling product, demonstrated superior clinical outcomes, including better function and greater patient satisfaction compared to traditional, off-the-shelf implants. ConforMIS owns or exclusively in-licenses approximately 500 issued patents and pending patent applications that cover customized implants and patient-specific instrumentation for all major joints and other elements of the iFit[®] Image-to-Implant[®] technology platform. ConforMIS believes its iFit[®] Image-to-Implant[®] technology platform has application to other major joints in the worldwide market for joint replacement products.
